

“1954 W. E. Le Gros Clark in Floyd & Welford *Sympos. Human Factors in Equipment Design* ii. 5 A Man and his machine may be regarded as the functional unit of industry, and the aim of ergonomics is the perfection of this unit so as to promote accuracy and speed of operation, and at the same time to ensure minimum fatigue and thereby maximum efficiency.”

“1970 *Sci. Jrnal*. Apr. 28/2 The whole subject [of absenteeism] indeed is of interest...to sociologists and ergonomists (industrial psychologists and work physiologists).”

Master, pertaineth it not to thee, that we perish? ~Mark 4:38
